

In the Shadows

Our secret agent follows strange clues through an abandoned amusement park after dark. The music is both haunting and powerful and keeps building in intensity. Broken rides creak in the wind, lights flicker on their own, and something mysterious darts between the shadows—never fully seen. Keep the dynamic range limited and listen carefully. Whatever it is keeps slipping out of sight, not wanting to be discovered, always just out of reach.

Slow, steady and secretive ♩ = 56
